

- The Supply Chain Innovation Center at Governors State University (SCICBI) is driving innovation and growth along the I-57 Corridor, a strategic area just south of Chicago that boasts expansive, development-ready land and direct access to heavy power infrastructure and major transportation rail and highway assets. This corridor has recently attracted global leaders such as **Gotion, People Works, and Samsung**, drawn by the region's skilled workforce and world-class logistics infrastructure.
- SCICBI is actively cultivating opportunities in cutting-edge industries including **drones, advanced battery systems, eVTOL technology, solar manufacturing, electric motors, electric vehicles, optimization software, and quantum computing**. By targeting these high-growth sectors, we are shaping a dynamic tech ecosystem poised to lead the Midwest into the future.
- Our robust partnerships with the Chicago Southland Economic Development Corporation, regional colleges, State Universities connected with the Illinois Innovation Network, Industrial brokers such as JLL, and workforce development programs ensure a steady pipeline of highly trained talent aligned with the evolving needs of the tech economy. Combined with ongoing infrastructure investments and proximity to key transportation hubs, the Chicago Southland is uniquely positioned as a premier destination for forward-thinking companies ready to scale.
